FaceTec Product Security Assessment
OWASP ASVS Level 2: Standard

Product Security Evaluation Performed by Independent Experts

Praetorian benchmarked the security posture of FaceTec's SDKs against OWASP Application Security Verification Standard (ASVS) Level 2: Standard. This document confirms the results of the recent security evaluation undertaken by Praetorian. Between the dates of May 24, 2021 and June 09, 2021, Praetorian benchmarked the security posture of FaceTec's Browser v9.2.3 SDK against OWASP Application Security Verification Standard (ASVS) Level 2: Standard. During the assessment, Praetorian identified 0 critical risk issues, 0 high risk issue, 0 medium risk issues, 0 low risk issue, and 0 informational issue.

As FaceTec's SDKs continue to change, so too will their overall security posture. Such changes will affect the validity of Praetorian's findings and this letter. Therefore, any statements made by Praetorian only describe a “snapshot” in time. Praetorian would like to thank FaceTec for this opportunity to help the organization evaluate its current security posture.
